Subject: Microsoft Decision

Now that you have reached the decision regarding Microsoft let's get on with letting Microsoft do what it does best, produce great products. You will always have to listen to the "whiners," e.g., Sun Microsystems, and all the others that testified before Congress about how Microsoft has "done them wrong."

Really, these losers are just crying on your shoulder because their products can't compare with Windows and other Microsoft products. I wouldn't buy Microsoft's competitor's products anyway. These competing products like Linus, Unix, Sun Microsystems online servers are OK for businesses to use, but, they will never be able to lure home users like me to their products. Why switch to something harder to use when you don't have to make the change.

I am going to buy the product that I want to use, not what these "whiners" want me to buy.

Press on with the decision you have made and tell the court to tell the remaining states that want to further rake Microsoft over the coals to grow up and stand down.

Thank you for the opportunity to comment on this important issue.

P.S. I am certainly happy to see Microsoft's competitors losing their corporate butts in the stock market.
